

"Documentation"

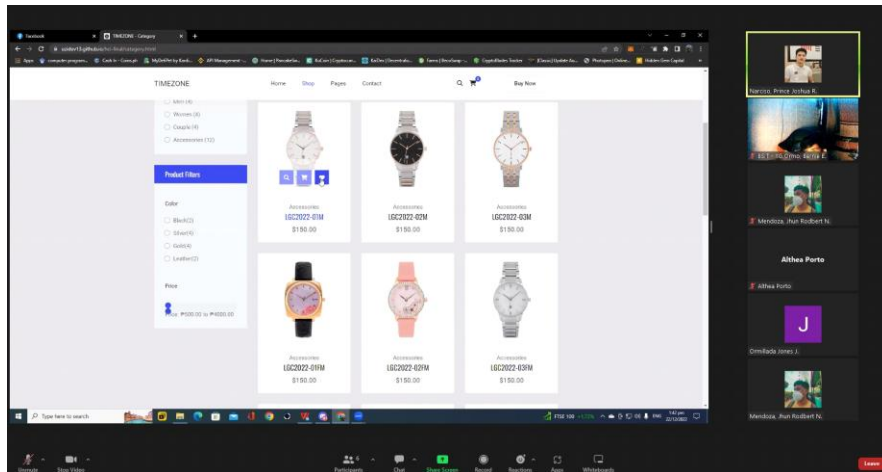

Day 1

We discussed the criteria that we are going to work on together. The design, theme, structures and etc. We combined all the knowledge that we have in our mind so that we can create a fine output.

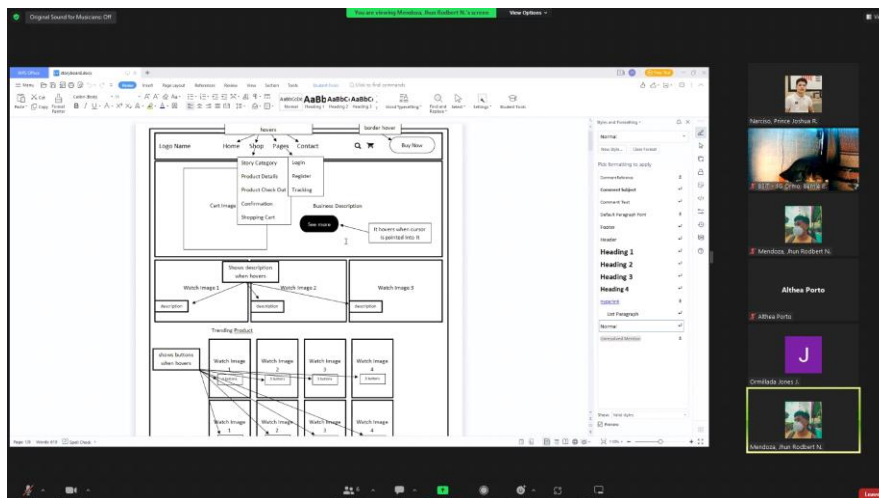

Day 2

On day two (2), this was where we begin to help each other to work on the HTML codings for making a designs and structures.

Day 3

On day three (3), We were finalizing the designs of our website and making it more attractive and passionate. There were a lot of ideas gathered from each other to make our website brilliant.

Last day!

After we were able to finalize our website, we worked on the Story Board together to complete our group project.
